The vision of Wake Christian Academy is to, "Emphasize the Preeminence of Christ in Life and Learning." It is through this vision statement that we have established the following goals in our efforts to build a future for our school and to raise financial resources outside of tuition:

- To build a school that partners with the family and local churches to prepare our children for service in the Kingdom of God

- To build a school that will provide a Christ-centered education for our children

- To build a school that will impact our community with the Gospel of Jesus Christ

These objectives guide our development department as we build a future for Wake Christian Academy. We are concerned with the long lasting relationships that we are able to develop through these activities. It is important that every member of the school family be involved in building a future with their time, talents, and treasures. God has given to each of us abilities which must be used for His honor and glory. The leadership of Wake Christian Academy has developed a strategic plan for the future growth and expansion of our school; but as the strategic plan is implemented, the need for your involvement is vital. Please prayerfully consider how you can be a part of "Building the Future" of Wake Christian Academy.
